Hillside Practice Participation Group

Are you interested to know about the practice?

- Would you like to know more about the services we offer, why and how we offer them?
- Would you like the opportunity to have a say in how these and new services are offered in the future?

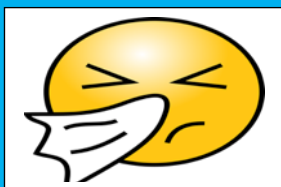

If yes to the above

Antibiotics

“It’s only a virus”

While virus infections can be serious and make you feel ill, unfortunately antibiotics don’t work for them. Also antibiotics can cause problems such as rashes, diarrhoea and severe allergies. They also encourage bacteria to become resistant so they don’t work in the future. Most infections, including cystitis, tonsillitis and bronchitis, get better without them. If you are concerned please contact your local pharmacy for advice.

COVID BOOSTER VACCINATION

Hillside Practice is not contracted to do Covid Boosters.

If you receive an invitation from NHS England for your Covid booster vaccination, please follow the link to book or telephone 119 where an operator will guide you through the process.

If your house bound and your medical records state this, you will receive a home visit for your Covid booster.
